

Standard Informer Roadshow Training Agenda

The Informer Roadshow is typically broken up into two days. At the end of each discussion point, there will be hands on exercises to complete.

Day 1

Topics covered include:

- What is Javascript?
- Creating variables
- Creating statements
- Creating simple columns
- Creating complex columns
- If statements
- Conditional statements
- Using controlled loops

Day 2

- Date methods and Operations
- Array Data Type
- Referencing Values in an Array
- Stepping through an array
- Creating functions using javascript
- Using functions with Informer.

The morning of day two will complete all items on the agenda. There will be a question and answer session after completion. The second afternoon is conducted in an open lab format where the attendees will try to use their knowledge and create calculated columns with the assistance of the instructor. If possible, the attendees will log into their own instance of Informer and be able to work on their local databases.
