Course Description

What really allows people to attempt to master difficult, challenging tasks when the perceived and real risks of failure are strong? What keeps people persisting at something after they have experienced failure? How can a coach provide an environment in which the drive to succeed is greater than the fear of failure? For everyone, including athletes, these are very common challenges. Understanding the important behaviors and attitudes (mindsets) which are necessary for success is the first step to actually helping someone acquire persistence, mental toughness, and other behaviors associated with peak performance. This course is designed to present several varied, yet practical, real-life experiences and applied activities to the coach or teacher that will help them to gain an understanding of the role our mindset plays in performance psychology – particularly in sport. Learning how to develop psychological skills necessary for highly successful performance is also part of the course experience. Hopefully this course can inspire and motivate coaches and their students or athletes toward achievement levels that they may not have felt possible.

National Standards Addressed in This Course

National Board for Professional Teaching Standards (NBPTS)

(<http://www.nbpts.org/standards-five-core-propositions/>)

First published in 1989 and updated in 2016, [What Teachers Should Know and Be Able to Do](#) articulates the National Board's Five Core Propositions for teaching. The Five Core Propositions - comparable to medicine's Hippocratic Oath — set forth the profession's vision for accomplished teaching. Together, the propositions form the basis of all National Board Standards and the foundation for National Board Certification. Course assignments have been designed so students can demonstrate excellence against these professional teaching standards whenever possible.

- Proposition 1: Teachers are committed to students and their learning
- Proposition 2: Teachers know the subject they teach and how to teach those subjects to students
- Proposition 3: Teachers are responsible for managing and monitoring student learning
- Proposition 4: Teachers think systematically about their practice and learn from experience
- Proposition 5: Teachers are members of learning communities

National PE Standards (<https://www.shapeamerica.org/standards/pe/>)

Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability. The documentation must be from a qualified professional in the area of the disability (i.e. psychologist, physician or educational diagnostician). Once documentation is on file, arrangements for reasonable accommodations can be made.
