Course Description

Being a successful coach is an enormous challenge. School administrators, parents, athletes, and entire communities all have high expectations of today's coaches. Think about the various elements of successful coaching beyond simply the skill requirements of the respective sport. The coaching profession requires the coach to function effectively as an administrator, leader, and psychologist. The ability to successfully organize, lead, motivate, relate, and evaluate is foundational. Most people who go into coaching have a solid foundation for the physical skills required for their particular sport. Successful coaching involves much more than this. The purpose of this course is to assist the coach in their professional development relative to the overall requirements necessary for the coaching profession.

Instructor/Student Contact Information

Throughout the course participants will be communicating with the instructor and their classmates on a regular basis using asynchronous discussion forums. A virtual office is utilized for class questions and students are provided with instructor contact information in the event they want to make email or phone contact. In addition, students are encouraged to email or phone the instructor at any time. Students will also receive feedback on the required assignments after they are submitted. The instructor can field any assignment questions and learn what has been most beneficial to the student at any time – convenient to the student.

Reflection Forums

Participation is an important expectation of this course and all online courses. Online postings promote reflection and analysis while allowing students to appreciate and evaluate positions that others express. While students may not be engaging with the same students, throughout this course they will be expected to offer comments, questions, and replies to the reflection question whenever possible. The faculty role in the discussion forum is that of an observer and facilitator.

Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability. The documentation
