

COME LEARN WITH US!

The Changing Brain – Applying the Principles of Neuroplasticity to Pain, Posture, Stress, and Low-Tech Rehab

Presented by Dr. Brian Jensen

CE Provided by Northwestern Health Sciences University

LEARN:

- Explore the relationship between the adaptive neurological responses when exposed to environmental and subconscious stimuli and the effect it has on physical, emotional and physiological responses.
- A practical clinical approach to the complex challenges we face in this current environment of super stress.
- How to evaluate and treat the patient relative to: Adaptive Neurological Responses, Postural Integrity and Functional Movement.
- Get hands on experience related to patient assessment, treatment and rehabilitation which can be easily incorporated into practice.
