

Interacting with Query Results

Training Agenda

In this course, participants will learn how to interact with data, once access to the query and/or reports been granted. This includes actions, filters, column formatting, visuals, and interacting with reports that have been shared with you (Dashboards, Comparison Boards, Data Views)

Audience: Users who have Datasets and/or reports shared to them. This class is strictly for interacting with pre-built Datasets and Reports. We will not be building Datasets in this class. All attendees will be given access to the sandbox in order to follow along and take part in the interactive exercises.

Topics will include:

- Accessing Query Results
- Interacting with Query Results
 - Actions
 - Using Filters
 - Column Options
 - Pivot Table
 - Discover
 - Visuals
 - Managing Filters
 - Access and Sharing
 - Jobs
- Interacting with Reports
