

PLANT MORPHOLOGY FOR BOTANICAL ILLUSTRATORS

BIL300

Required Text:

- Rauh, Dick and Jeff Falk. *The Science Behind Flowers: Plant Morphology for Botanical Artists*, 2020

Recommended Texts: Not required for this class, but if you want to build your botanical library:

- Michael Hickey and Clive King, 2013, *The Cambridge Illustrated Glossary of Botanical Terms*.
- Michael Hickey and Clive King, *Common Families of Flowering Plants*, 2008.
- Zomlefer, *Guide to Flowering Plant Families*, 1994. The illustrations throughout are clear, accurate and beautifully detailed and are worth referring to. If you can afford it, it is a wonderful addition to your library.
- Harris & Harris *Plant Identification Terminology*. An illustrated glossary that is well-organized and quite thorough.

Materials List

- Digital Microscope that plugs into your computer: [Link to item on Amazon](#)
- A notebook in which you can take your notes and make your drawings both in class and at home draw where you will create your final labelled flower illustrations each week.
- Pencils: 2H and HB
- Soft eraser (kneaded or plastic)
- Tweezers
- A scalpel, razor blade, or sharp knife
- 6-inch see-through ruler.
- Colored pencils
