

Making Kombucha – Online, CKG2010

Materials List:

Students will need to order a Kombucha SCOBY online or obtain one from other sources. Here are some links where they can order from.

- SCOBY
- Sugar (no alternative sweeteners)
- Green or Black tea
- Large glass, ceramic, or plastic vessel to ferment in

Since kombucha brewing is a two step process students should do their brewing during or after class session so that things have time to cool down. We will cover this more in depth in class.
