HRT302 – Soil Science II – ONLINE

George Lozefski

Because the course is online, your instructor has requested that you purchase some simple soil test kits for use in the course's at-home labs. I have included a link to the kit you should purchase at Amazon (though you're welcome to purchase the same kit elsewhere, be it online or locally):

[Luster Leaf 1601 Rapitest Test Kit for Soil pH, Nitrogen, Phosphorous and Potash, 1 Pack](#)

Please note you will need the kit by **Week 2** of the course.
