

Hands-On Informer 5 Training Sessions

Introduction to Informer 5:

New to Informer 5? This workshop will guide you through the new features and functionality of Informer 5. Learn how to build a basic Dataset, add simple Flow Steps, use the Discover tool and Pivot Tables, and generate Reports from the data. We'll also talk about Jobs and scheduling, and give a basic overview of the new security model using Teams. You are not required to have Informer 5 installed at your organization, as we will provide access to an Informer 5 sandbox environment. Use of a WiFi-enabled laptop or tablet (not provided) is highly recommended. This session is for general users.

Advanced Informer 5:

In this session, we will do a deep-dive into Informer 5's Flow Steps to see how you can extract further value from the data you are using. Learn how to use the API to access Informer content from outside of the application. Get a basic understanding of how to develop your own plugins for Informer 5 to extend its functionality. You are not required to have Informer 5 installed at your organization, as we will provide access to an Informer 5 sandbox environment. Use of a WiFi-enabled laptop or tablet (not provided) is highly recommended. Knowledge of JavaScript or similar scripting language is very helpful. This session is for advanced users.
